

SOC Incident Report

Report Type: SOC Incident Response

Target: Ransomware Detection - Finance Server

Analyst: Phangasasa Muhlaba

Date: 2026-05-20 11:16

CONFIDENTIAL - For Authorized Personnel Only

Cybersecurity Report

Executive Summary

This report presents the findings from a security assessment. A total of 5 security findings were identified. Of these, 1 Critical, 0 High, 0 Medium, and 0 Low severity. All findings include detailed descriptions and remediation guidance.

Total	Critical	High	Medium	Low
5	1	0	0	0

Incident Details

Incident Title: Ransomware Detection - Finance Server
Severity: Critical

Affected Systems

- FINANCE-SRV-01 (192.168.1.10)
- BACKUP-SRV-02 (192.168.1.11)
- WORKSTATION-FIN-05 (192.168.1.25)

Incident Timeline

2026-05-17 08:12 Unusual file encryption activity detected on FINANCE-SRV-01
2026-05-17 08:15 Alert triggered by EDR solution - ransomware signature match
2026-05-17 08:18 SOC analyst notified and investigation started
2026-05-17 08:25 Affected systems isolated from network
2026-05-17 08:40 Incident escalated to Incident Response team
2026-05-17 09:00 Forensic investigation initiated

Indicators of Compromise (IOCs)

- MD5: 5f4dcc3b5aa765d61d8327deb882cf99
- IP: 185.220.101.45 (C2 server)
- Domain: malicious-c2.onion
- File: svchost32.exe (malicious)
- Registry key: HKLM\Software\Microsoft\Windows\CurrentVersion\Run\svchost32

Response Actions Taken

Cybersecurity Report

- Isolated affected systems from network
- Blocked C2 IP at firewall level
- Initiated forensic imaging of affected systems
- Notified management and legal team
- Preserved evidence for investigation
- Started restoration from clean backups

Recommendations

Immediate:

Conduct a full forensic investigation of all affected systems before restoration.

Credentials:

Reset all credentials for potentially compromised accounts including service accounts.

Containment:

Verify complete isolation of affected systems and confirm no lateral movement.

Evidence:

Preserve all logs, memory dumps, and disk images for forensic analysis.

Communication:

Notify stakeholders including management, legal, and affected parties per your IR plan.

Recovery:

Restore systems from verified clean backups only after forensic analysis is complete.

Lessons Learned:

Conduct a post-incident review within 72 hours and update IR playbooks.
